START WITH WHY

ABOUT ME

my name Bagas Setya Nugraha,i am a 3rd semester student of CCIT FTUI majoring in TI (teknik informatika) and chose program software engineering , operating at the Faculty of Engineering, University of Indonesia.

PLAN CAREER

software engineer

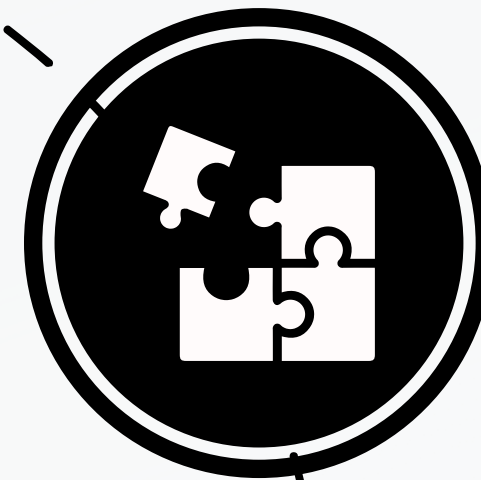

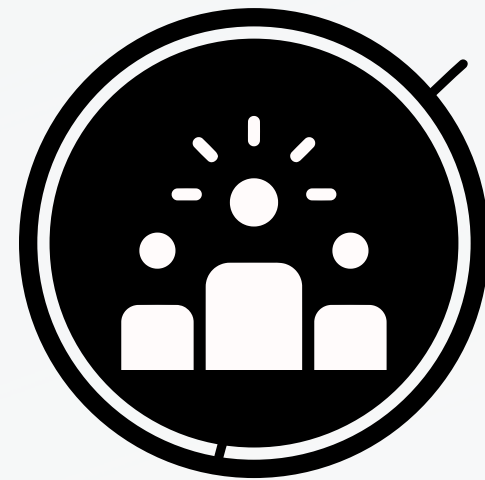

in the IT field I am interested in a software compared to hardware, which is related to coding and creating, designing and developing a software program, and also this is very in accordance with the program major that I took, namely software engineering.

IT Manager

I am determined that if I am already very expert in the IT field for a more exciting level I want to become an IT manager.

FullStack developer

I'm interested in being a frontend developer and also interested in being a backend developer, so why don't I take both by becoming a fullstack developer to create a web or application.

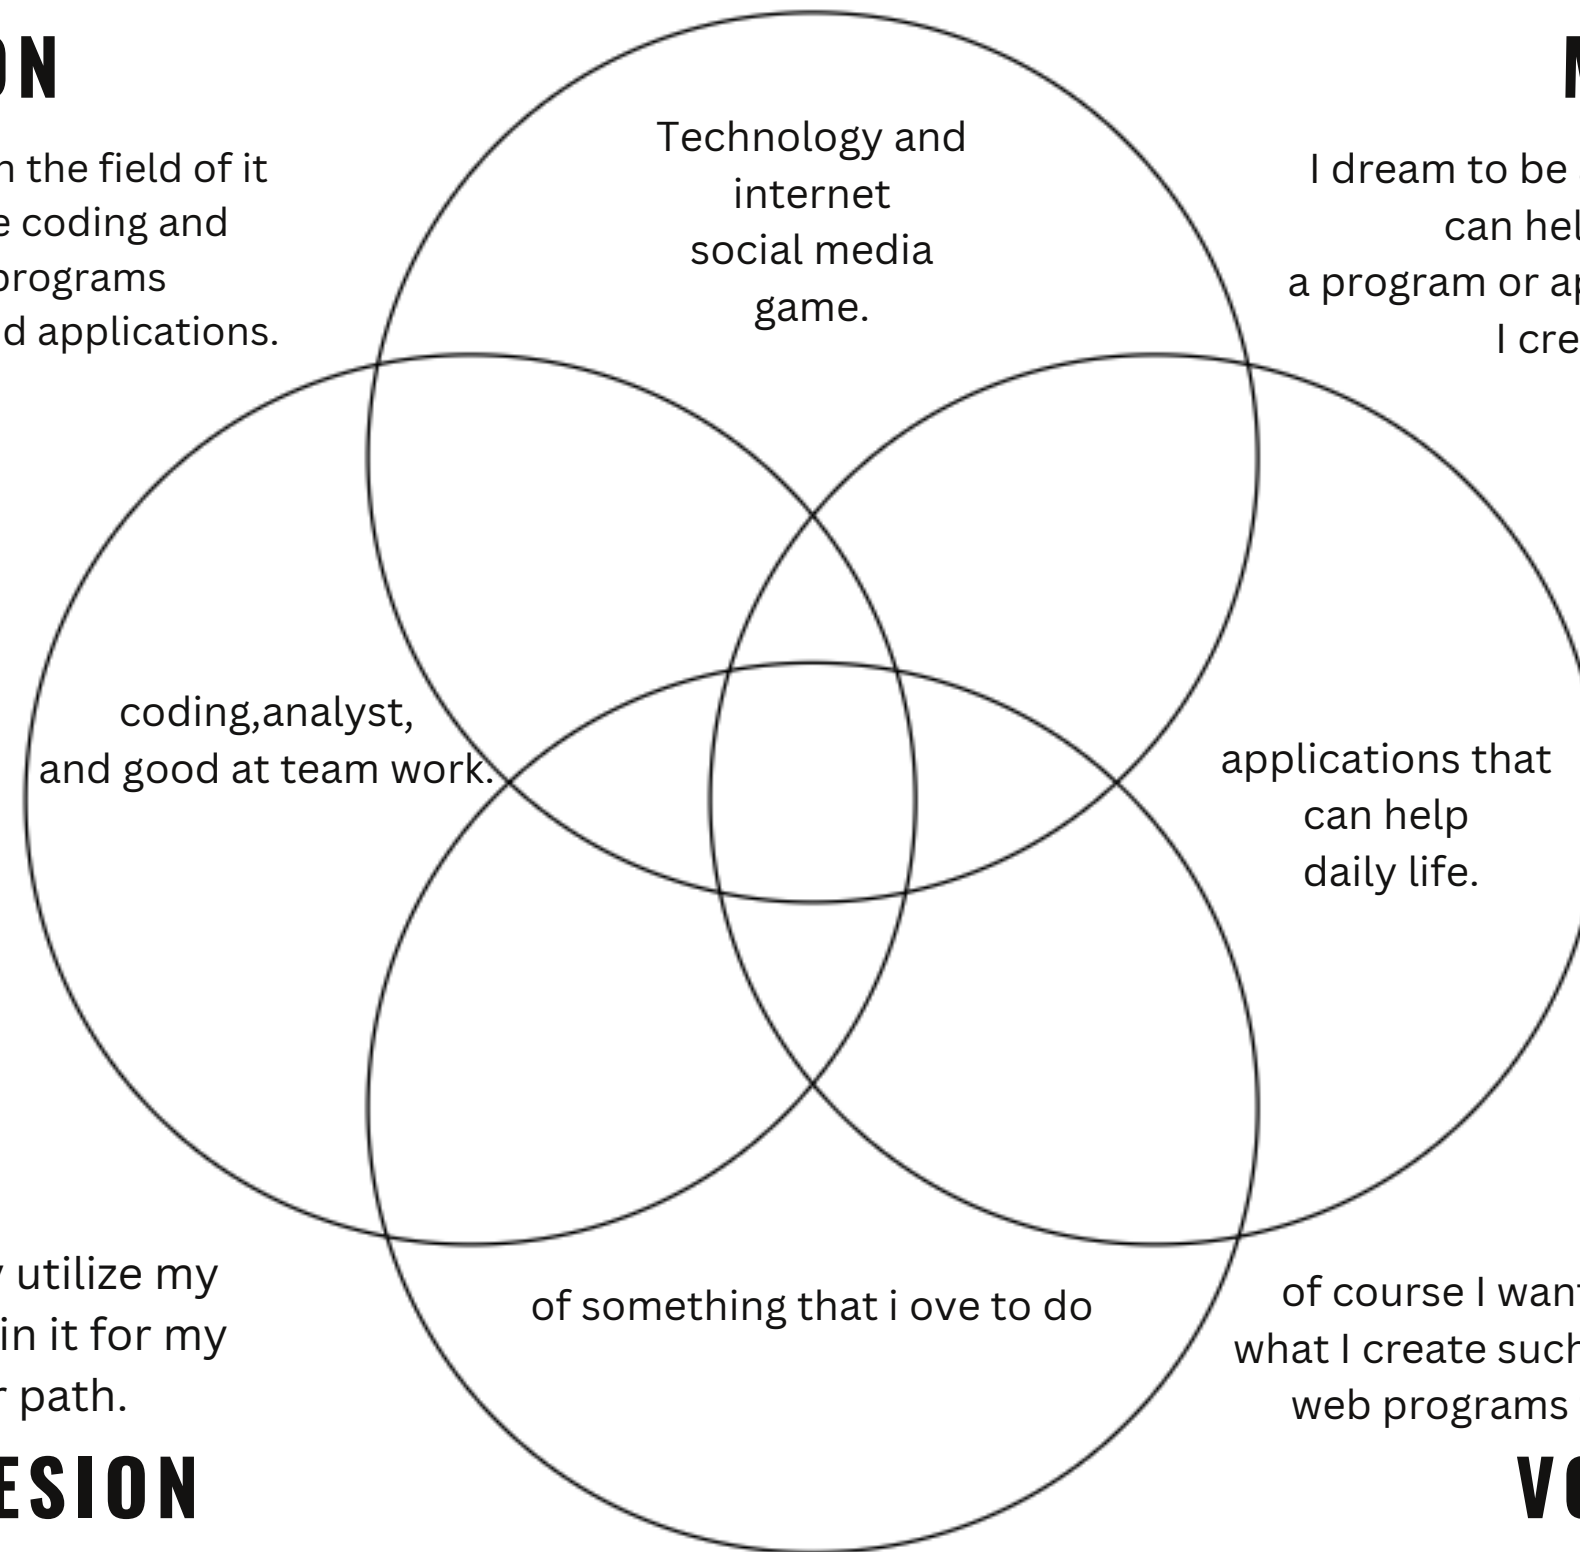

IKIGAI

PASSION

My passion is in the field of it because I like coding and creating programs such as web and applications.

MISSION

I dream to be a person who can help with a program or application that I create.

I will highly utilize my knowledge in it for my career path.

PROFESION

of course I want to be paid for what I create such as application or web programs that I work on.

VOCATION

SWOT

STRONG

I am very confident, and easy to get along with anyone, adaptable and like to learn new things.

WEAK

I'm a bit lazy, and also easily provoked by something.
and also whatever I do depends on my mood.

OPPORTUNITIES

I am adaptable and sociable, which can be an opportunity for me by looking for good networking and utilizing my skills.

THREATS

If there is someone who is more ambitious or more than me, I am easily insecure.

START WITH WHY

Why do I want to have a career in IT?

because first I really like technology and coding, plus the career path that I see is very good

because when I graduate I want to create a program / application / web that can help people in carrying out their daily activities, because in an era like this we must make the best use of technology.

and also earn an income from what I love and work on as a developer to make myself happy first and then the people around me.
