ABOUT ME

my name Bagas Setya Nugraha ,i'm a 4th semester student of CCIT FTUI majoring in TI(teknik informatika) and chose program software engineering operating at the Faculty of Engineering,University of Indonesia.

I've been interested in programming since I started college, then from what I learned and also the projects I made during college, because it's fun for me especially when the programs we make run well, that's what I like about programming, and so far what I have learned about programming is learning various programming languages, how to load the web as a web developer with its frontend and backend, learning about databases, testing projects, then learning about DevOps using git,docker and jenkins,then creating mobile applications, and so on.
